

# Let's go fly a

# kite

You will need:-

- strong lightweight fabric
- 2 pea canes or thin sticks
- strong string
- felt tip pens/fabric markers.
- 4 x 150cm ribbons for tails.
- strong tape eg duct tape

1. Copy the kite shape onto a piece of lightweight strong fabric. Old bed sheets are ideal. All measurements are approximate and can be adjusted.

2. Cut out the 'air vents' and small string holes at both \*

3. Decorate your flag with felt tip pen and fabric markers.

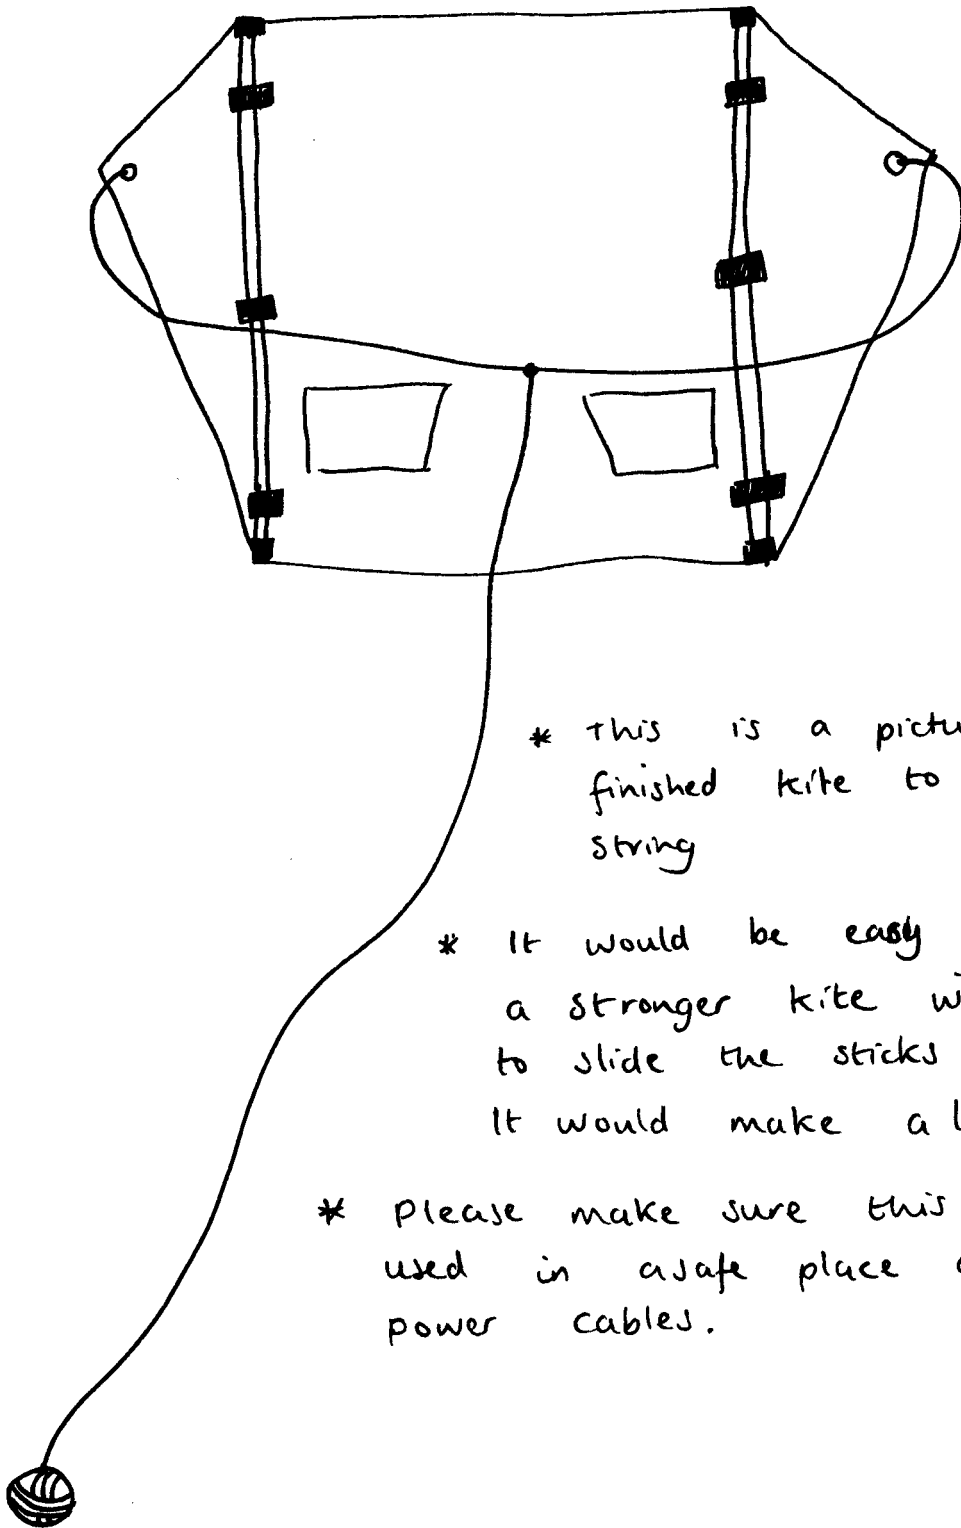

4. Use a strong tape to attach the pea canes. Make sure to tape over the end of the cane onto the fabric. By folding it over the top the sticks will be held securely

5. Cut a length of string 100cm. Attach each end to the \* holes. Now attach the ball of string to the centre of this cross string. Attach ribbons to the bottom of the pea canes to make tails.

6. Now find a safe place with a windy hill and run until your kite soars.....

page 2.

\* This is a picture of a finished kite to show the string

\* It would be easy to make a stronger kite with pockets to slide the sticks into. It would make a lovely gift.

\* Please make sure this kite is used in a safe place away from power cables.

All measurements are in cm's. This pattern is not to scale.
